

KIC 10583181

Outputs

Target: KIC 10583181
Mission: KEPLER
Period: 2.6929 days
Primary depth: 0.2456
Secondary depth: 0.2346
Depth ratio: 0.956
Program classification: EW

Interpretation:

1. KIC 10583181, the period observed and calculated are similar to the observed value.
2. Failed the morphological classification due to just using the eclipse depth, which placed it in EW instead of EA

Potential solutions to this morphological issue:

1. Already spoke on this. Please refer to the KIC 5621294 document
